Art Unit: 1742

### ***Specification***

This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.

### ***Claim Objections***

Claim 3 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The above claim does not fairly further limit independent apparatus claim 1 because it has been well settled that the manner or method of use of an apparatus cannot be relied upon to fairly further limit claims to the apparatus itself. See *In re Casey*, 152 USPQ 235 and MPEP 2114.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-3 are rejected under 35 U.S.C. 102(a) as being anticipated by WO 99/03630.

WO 99/03630 teaches, in the embodiments of figures 1 and 3 for example, a crucible and oscillating member showing all aspects of the above claims.

*Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of Oeftering, Tseng et al'765, Tseng et al'711 and Tseng are also cited as further examples of prior art crucibles and droplet forming means.
